(54) CONTAINER FOR HOUSING/STORING THIN PLATE

(57)Abstract:

PROBLEM TO BE SOLVED: To enhance sealability between a cover 4 and a container body 2, and mountability/demountability of the cover.

SOLUTION: A cover 4 is provided with a double seal mechanism 65. The double seal mechanism 65 comprises an inner seal piece 66 for hermetically sealing the inside of a container body 2 while being held by an inner seal receiving part 15 and a seal pressing part 32, and an outer seal piece 67 for hermetically sealing the abutting part of the inner seal piece 66 and the inner seal receiving part 15. An inflating part 66C being fitted in a fitting groove 16 is provided at the forward end of the inner seal piece 66. Means 37 for securing the cover 4 comprises a latch shaft 41 projecting linearly and retractively from the cover 4, a latch roller 42 fixed to the forward end of the latch shaft 41, and a crank mechanism 39 for projecting the cover 4 retractively from the cover 4 through rotation. On the container body 2 side, a plane 22B for drawing the cover 4 to the container body 2 side is provided.
